**BALLYBRENNAN, KILLINICK, CO. WEXFORD.**

# GUIDELINES FOR SELECTING A RAM ON PERFORMANCE FIGURES

1. **LMI or LMI-SR:** When selecting a ram choose one with a high LMI or LMI-SR (figures are more accurate and reliable). The LMI is the best indicator of the ram's breeding merit to produce lambs, which will have good growth rate, good muscling with not too much fat cover.

The ram lamb's EBVs for Liveweight (LWT), Muscle Depth (UMD) and Fat Depth (UFD) go to make up his LMI and indicate how much superior to the breed average he is for each of these traits.

**Superior** rams are those with an LMI or LMI-SR above 100.

2. **EBV-LWT:** If you want a ram to **increase the growth rate** of your lambs, choose one with a high **EBV-LWT**.
3. **EBV-UMD:** If you want a ram to **increase the muscling** of your lambs, choose one with a high **EBV-UMD**.
4. **EBV-UFD:** While if you want to **maintain fat cover** at a reasonable level, select a ram with an **EBV-UFD** close to 0 or which is slightly negative.
5. **Conformation:** Finally when you have selected a ram with good genetic merit for performance on the above traits, examine the ram so that he meets your requirements for **Conformation, Type and Soundness**.
